

MONTE SANT' ANGELO MERCY COLLEGE

SCIENTIA TERRACE

State-of-the-art Sports, Innovation, Science, Social Justice and Enterprise facility.

Scintia is Latin for knowledge and forms part of the College motto, *Religio, Scientia, Cultus*. At Monte, we believe we are shaped by what we know and value. Ultimately, knowledge is critical for young women to prosper in the world.

For nearly 150 years, Monte Sant' Angelo Mercy College has led the way in educating and empowering girls and young women. Our duty is to ensure we honour the vision and progressive ideals of a Mercy education and to be intentional in the advancement of young women.

Opened in May 2023, Scientia Terrace is a state-of-the-art Sports, Innovation, Science, Social Justice and Enterprise facility. Over six levels, it offers specialised laboratories and a Scientist in Residence, a dedicated social enterprise and innovation hub, and flexible learning and outdoor spaces. It has transformed the Monte campus to enrich learning and inspire creativity, which in turn, will empower Monte students now and in the future.

“

Scientia Terrace brightens our learning community as a dynamic learning haven; a place where people can thrive through collective creativity. The centre acts as lungs to the campus, energising and supporting us into the future to always explore with passion, work tenaciously with others and accomplish remarkable things.”

ALLYSON MASCARENHAS
DEPUTY PRINCIPAL CURRICULUM

A Mercy education seeks to challenge our girls to think critically and to take action – the impetus for societal change.

Science Centre

- Eleven Science, Sports Science and PDHPE laboratories
